

Central Enteric Reference Laboratory,
Colindale Avenue, London, N.W.9.

9th February, 1953.

Dear Professor Lederberg,

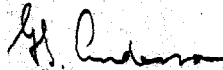

Many thanks for your letter of February 4th. I hasten to assure you that I was in no way offended by your letter of January 13th. My letter of January 22nd was intended only to explain why it was impossible for me to stay in your laboratory for the whole period of the Fellowship. I felt in any case that my visit to America would be incomplete unless I spent some time in your department.

Perhaps the best plan would be for me to arrive in your laboratory on Monday, the 18th May as I originally suggested and to leave the exact duration of my stay open for the moment so that we can discuss it after my arrival.

I learnt the dates of the Cold Spring Harbor Symposium after writing to you on January 7th and wrote to Dr. Demerec saying I would like to attend. In his reply Dr. Demerec has kindly offered to reserve accommodation for me.

Spicer has not yet returned but I believe that he will be here by the end of this week. I expect that he will be able to advise me where to stay when I come to Madison.

Yours sincerely,

E. S. Anderson

Professor Joshua Lederberg,
Department of Genetics,
University of Wisconsin,
Madison,
Wisconsin, U.S.A.
